Of course it is understood that, when half a dozen combinations are traveling under the above title, no one of them pretends to comprise any of the artists who played in the Madison Square Theatre, New York. What it does imply is (and that is a good deal) that these companies are under the general direction of the organization, which has so successfully run that theatre for two years, and that they play the dramas which were produced there, and of which it is presumed that organization holds the acting copyright. Catarrh is the forerunner of bron chial troubles, lung diseases and pre-mature death. It is a loathsome disease, that if neglected soon attacks the ital organs.
